 weight  
1.00 Lbs

 market  
USA, Rest of  
World, Europe

 UPC/EAN  
00616909358694

StreamBlue is a super high-quality Bluetooth 4.0 audio streaming interface that provides a seamless and secure bi-directional wireless connection from your tablet or smart phone. The included and selectable analog RCA or digital S/PDIF (electrical coaxial) allow the StreamBlue to be used by itself, directly connected to a factory or aftermarket audio input or aftermarket amplifier, or to a third party audio processing unit with either analog RCA or digital S/PDIF input. StreamBlue supports pairing of up to 8 different devices and provides a 1 AMP output to turn on external devices whenever a paired device is active.

Additionally, when used in an application where a tablet or smart phone is used to replace the factory radio, the StreamBlue, coupled with a vehicle compatible steering wheel control interface from PAC®, Metra® or iDataLink®, allows steering wheel control functionality for safety. Please check with the manufacturers of these steering wheel control devices to ensure compatibility and functionality with your vehicle prior to installation (factory radio cannot coexist with the StreamBlue for steering wheel control functionality).

**Note: If purchasing for a M.O.S.T. equipped vehicle, you must combine this with a compatible MOST-AUX. See compatibility chart below.**

### Car Radio Versions

2G MMi

Any

iDRIVE (4-PIN)

M.O.S.T. equipped system

PCM2

### StreamBlue Compatibility Chart

Model	Year Range	Version	Radio	Notes
