

MB-Video Radio Modification (service)

Price:
\$900.00

This modification is used for select radios that have no option of adding a video input (typically for reverse cam) with any available interface. ***This modification will add 3 video inputs, including one rear camera input, selectable by wire trigger (rev cam) or included pushbutton switch (video inputs).***

Note: This is a video modification only, and if an audio input is desired, the vehicle must have a CD Changer and a [MOST-Aux/MB](#) must also be purchased.

After receiving the Mod# and filling out the Mod form (below), the unit must be packaged thoroughly and sent to NAV-TV to be modified at the board level, tested and sent back with the proper components. There is a 3-DAY turn-around for this process.

Notes:

1. NAV-TV will not take any responsibility for a radio that is shipped without adequate packing materials or insurance.
2. All CD's and DVD's must be removed from the radio before shipping to avoid damage to the radio. If the radio requires a navigation disc to operate, please include it in a separate padded envelope.
3. If the radio has a motorized face that folds down to expose the CD slot, then it requires MOD022A, which is \$50 more.
4. If the radio has both a CD and a cassette player, then extra parts must be used in the modification and an extra \$100 charge will apply.

Contact NAV-TV with questions on this process or for compatibility at (954) 323-1010.
